

Streaming Faith Services

All of our services include a customized interactive media player that allows you to brand yourself in the market place, poll your audience, promote products, increase e-commerce sales, chat live with viewers and offer your audience many other features that will leave them wanting more. You will also have the option of being listed on www.streamingfaith.com, the premiere destination for faith based programming that hosts more than fifteen 24/7 broadcast networks and over 40 live events each week with a global audience of millions.

Live Worldcast Services

Live Worldcast Services provide your ministry with the ability to broadcast live to a worldwide audience or to a private audience anytime you wish.

You will receive a state-of-the-art encoding and broadcast server that is delivered and installed at your location and then managed and monitored by us for you from our Digital Media Center located in LaGrange, Georgia. Our broadcast professionals will assist you with the deployment of a turnkey broadcast solution that will allow you to focus on the production of your broadcast instead of worrying that the delivery of your online broadcast is of the highest quality.

Video and Audio On Demand

On-demand means that your programming can be seen/viewed by a global audience at any time, day or night.

With our Video/Audio On-demand services, you will have the option of either encoding your messages and uploading the encoded file to us directly or sending us your tapes so that we can encode and upload them for you. We will then store the files at our data center and send you a link to place on your website so you will not have to worry about managing or distributing the content. We will also handle all aspects of distributing your content so you will not be limited as to the number of viewers/listeners that can access your content.

Interactive Satellite Rebroadcasting

Interactive satellite rebroadcasting will allow your station the opportunity to touch lives not only locally or regionally, but globally!

Interactive satellite rebroadcasting provides low and high power stations with the opportunity to increase their reach to a global audience. We will acquire your broadcast via satellite and then encode and redistribute your broadcast over the Internet through our state-of-the-art Digital Media Center located in LaGrange, Georgia. When compared to other traditional media, one out of five people consider the Internet to be the most essential source of information in their life and four in ten people indicate that time spent online has resulted in less time watching traditional television. The ability to distribute your current satellite broadcast online will not only provide you with the opportunity to reach your current audience in different ways, but will also allow you to build a new audience throughout the world.

"The opportunity to have the world at our doorstep and give ear to the Good News is no longer a dream for us... Streaming Faith has made it a reality."

- Dr. Mark Chironna,
*The Master's Touch
International Church*

"We have a church that watches our service in France. They put up a big screen and they worship with us on Sunday Mornings and I'm interpreted to them while they are watching. Because of Streaming Faith, God is speaking all over the world. "

- Bishop Eddie L. Long,
*President
Taking Authority Networks*

Streaming Faith Streaming Faith Services

The Streaming Faith Digital Networks unite congregants worldwide through www.streamingfaith.com, an advanced Internet broadcast destination.

Easy To Use

Presenting content in the familiar format of television and merging it with the interactive functions of the World Wide Web, the Streaming Faith Digital Networks offers a measurably rewarding, instantly effective vehicle for reaching and touching vast new audiences.

Easy To Embrace

Individuals seeking positive messages or contact with their favorite ministries can access multiple digital broadcast networks and live events featuring biblical teachings, uplifting music and personal empowerment programs. Using the computer mouse as a virtual remote control, users can view and listen to unique content from around the world on Streaming Faith in "real time," just like television.

Recognize The Rewards

Ministries now have the ability to communicate with viewers from around the globe and develop an ongoing dialog with these viewers that will make them an active part of the ministry for years to come.

"Online Gospel Network has been a blessing for our ministry. We are now networking with churches in other parts of the world like India and Africa. Online Gospel Network has definitely expanded our ministry internationally."

- Pastor Robert Humphries
CEO, Online Gospel Network
